

IN THE CLAIMS

1. (Currently Amended) Fluid supply unit, especially a hydraulic supply unit, with a pressure generator for the fluid, especially a pump for hydraulic fluid, and a pressure outlet, ~~characterized by the fact that~~ wherein a pressure booster (6) is installed between the pressure generator (2) and the pressure outlet (7) and is rigidly mechanically connected with the pressure generator (2).
2. (Currently Amended) Unit in accordance with Claim 1, ~~characterized by the fact that~~ wherein the pressure generator (2) and the pressure booster (6) are installed in a common housing, in which connections (5, 7) run between the pressure generator (2) and the pressure booster (6).
3. (Currently Amended) Unit in accordance with Claim 2, ~~characterized by the fact that~~ wherein the housing is constructed of more than one part.
4. (Currently Amended) Unit in accordance with Claim 3, ~~characterized by the fact that~~ wherein each of two housing parts has a joining surface (4), which together form an interface between the pressure generator (2) and the pressure booster (6).

5. (Currently Amended) Unit in accordance with ~~any of Claims 1 to 4,~~ characterized by the fact that Claim 1, wherein a tank (15) is rigidly connected with the combination of pressure generator (2) and pressure booster (6).
6. (Currently Amended) Unit in accordance with Claim 5, ~~characterized by the fact that~~ wherein the tank (15) is integrated in the housing.
7. (Currently Amended) Unit in accordance with ~~any of Claims 1 to 6,~~ characterized by the fact that Claim 1, wherein the pressure booster (6) is arranged in axial extension of the pressure generator (2).
8. (Currently Amended) Unit in accordance with ~~any of Claims 1 to 7,~~ characterized by the fact that Claim 1, wherein a motor (9) for driving the pressure generator (2) is rigidly mechanically connected with the pressure generator (2).
9. (Currently Amended) Unit in accordance with Claim 8, ~~characterized by the fact that~~ wherein the motor (9) and the pressure generator (2) have a common shaft (11).
10. (Currently Amended) Unit in accordance with ~~Claim 8 or 9,~~ ~~characterized by the fact that~~ Claim 8, wherein the motor (9) is designed as an electric motor.

11. (Currently Amended) Unit in accordance with Claim 10,
~~characterized by the fact that~~ wherein a battery (41) is housed
in the housing.
12. (Currently Amended) Unit in accordance with ~~any of Claims 1 to~~
~~11,~~ ~~characterized by the fact that~~ Claim 1, wherein the pressure
generator is designed as a pump (2) that has a set of gears (3).
13. (Currently Amended) Unit in accordance with ~~any of Claims 1 to~~
~~12,~~ ~~characterized by the fact that~~ Claim 1, wherein at least
some parts of the pressure booster (6) are made of light metal
or plastic.
14. (Currently Amended) Unit in accordance with ~~any of Claims 1 to~~
~~13,~~ ~~characterized by the fact that~~ Claim 1, wherein a pressure
relief valve (50) is arranged between the outlet of the pressure
generator (2) and a low-pressure connection.
